Highly motivated Software Engineering student with a solid foundation in front-end web development, containerization, and system infrastructure. Experienced in building responsive web interfaces and deploying them using modern DevOps practices. Eager to leverage academic coursework and independent training in hands-on environments, combining a strong grasp of networking and operating systems with practical software development skills.

EDUCATION

in Software Engineering

College of Electronic Technology

Tripoli

Relevant Coursework: Web Development, Operating Systems, Computer Networks, Object-Oriented Programming.

Independent Training & Coursework

- **Web Development:** The Odin Project
- Comprehensive open-source curriculum focusing on HTML, CSS, JavaScript, and responsive design.
- **Containerization:** Docker & Kubernetes Mastery
- Comprehensive orchestration and deployment training
- **Networking:** CCNA Curriculum
- Completed via Jeremy's IT Lab, establishing a strong practical foundation in network traffic, routing, and security.
- **Operating Systems:**
- Structured study of core system mechanics, memory management, and concurrency.

PROJECTS

Secure Kubernetes Infrastructure Platform (Graduation Project)

- Designing a resilient infrastructure platform grounded in zero-trust architecture principles.
- Utilizing Docker and Kubernetes to build highly available environments and manage the complete application deployment lifecycle.

Restaurants Menu Website

A frontend-only multi-restaurant food delivery platform designed as a school project.

Book Tracker

A comprehensive mobile application built with Flutter, designed to help users discover, organize, and track their favorite books.

Containerized React Web Application * Containerized Express.js REST API & Notes Service

- Containerized front-end and back-end applications to implement practical deployment workflows.
- Utilized multi-stage Docker builds to optimize image sizes, and configured local volumes and environment variables for consistent development environments.

SKILLS

- | | | |
|----------|--------------|------------------------|
| • C# | • HTML | • Linux Administration |
| • C++ | • Java | • Networking: CCNA |
| • CSS | • JavaScript | |
| • Docker | • Kubernetes | |

Languages

- Arabic (Native)
- English (Fluent)
